EDUCATION

B.Sc. in Computer Science

Mama Ngina University

3rd Year | Major in AI & Machine Learning

Software Engineering Certificate

Software Dev Institute

Full-Stack & Systems Architecture

Web3 Developer Certification

Hashgraph Developers

Distributed Systems & Smart Contracts

TECHNICAL SKILLS

Core Computer Science

Data Structures & Algorithms, Systems Architecture, DB Normalization

Languages

Python, Java, Kotlin, C/C++, JavaScript, SQL, Assembly (8085)

OS & Networking

Linux Systems Administration (Fedora, Ubuntu), Shell Scripting, Packet Tracer

Databases

Relational (MariaDB, MySQL) & NoSQL (MongoDB Atlas)

Software Tools

Git, Docker, KVM, VirtualBox, Postman, Vite

LAWRENCE OUMA OSIRO JR.

Computer Scientist | Systems & Software Specialist

PROFESSIONAL PROFILE

Computer Science scholar and practitioner with 10+ years of comprehensive operating systems experience and deep domain knowledge in theoretical CS, software systems, and network fundamentals. Pursuing a B.Sc. in Computer Science (Mama Ngina University) while applying theoretical concepts in automata, database normalization, and microprocessor architecture to real-world software engineering and systems administration.

CORE PROJECTS & TECHNICAL ACHIEVEMENTS

KilimoChat - Intelligent Software Platform / *Systems & Software Architect*

Tech Stack: Python, React Native, MongoDB Atlas, Linux

- Designed and implemented full software engineering lifecycle from requirement analysis to cloud deployment.
- Structured normalized relational models and optimized NoSQL document stores for rapid concurrent data processing.
- Analyzed algorithmic execution performance to minimize mobile client payload and system latency.

Systems Virtualization & Linux Administration / *Systems Engineer*

Tech Stack: Fedora, Ubuntu, Bash, VirtualBox, KVM

- Configured and managed multi-OS virtualized environments to benchmark system resource allocation and audio/network driver performance.
- Automated administrative system maintenance tasks using shell scripts across Linux desktop and server distributions.

PRACTICAL EXPERIENCE & TECHNICAL EXPERTISE

Theoretical & Applied Computer Science Foundations

- Strong understanding of discrete computational structures, database normalization standards, and software quality assurance.
- Hands-on experience with hardware/software interfacing concepts, microprocessor register design, and low-level

diagnostic tools.

Technical Leadership & Research

- Active member and technical lead for campus Computing Research & Innovation Club, organizing student technical tracks.
- Participant in prominent tech summits (DevFest Nairobi, Safaricom Decode, Cardano Summit).
